## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-4, 17 and 18 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Winkelman (3,057,094). Winkleman shows a terrarium adapted to be immersed in an aquarium containing water comprising a substantially vertical shaft means 32 having a first end 30 and a second end 20, and a receptacle 28 defining at least one wall, the at least one wall having length and presenting at least one opening 45 an air exhaust 33, 36, 37 and an interior wherein the receptacle 28 is connected to the shaft means 32 at the first end 30 and wherein the shaft means 32 at the second end 20 is operable to anchor the receptacle 28 in the aquarium 10 and support the receptacle 28 in an elevated position relative to the bottom wall 11 of the aquarium 10. Wherein the receptacle 28 extends beyond the shaft means 32 such that the opening 45 defines an area permitting entry into the interior of the receptacle 28 and wherein the interior of the receptacle is operable to receive air from an air supply 18, 19 so as to define a dry zone interior.

***Allowable Subject Matter***

Claims 5-8, 11, 12, 15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13, 19 and 20 are allowed.
